

Public Notice

As of October 1, 2014, Waste Pro of Florida, Inc. (Waste Pro) has been granted by the City Council of Cape Canaveral exclusive franchise right to the Construction and Demolition Debris Service within the City of Cape Canaveral (City).

Waste Pro shall provide collection and disposal service of construction and demolition debris to residential, multiple dwelling units, and commercial customers utilizing roll-off containers. Waste Pro shall directly bill such services at a rate listed in the City's Code of Ordinances, Appendix B, Schedule of Fees, posted on the City's website at **www.cityofcapecanaveral.org**.

The only exclusion to this exclusive franchise right is Contractors hauling their own construction and demolition debris are excluded from this provision, provided they use a dump truck or trailer owned by the Contractor.

Contact Waste Pro to order/schedule a roll-off dumpster at (321) 837-0055.

The definition of Construction and Demolition Debris is the same meaning proscribed in 62-701.200(24), Florida Administrative Code, which at the effective date of this notice means:

Discarded materials generally considered to be not water soluble and non-hazardous in nature, including but not limited to steel, glass, brick, concrete, asphalt material, pipe, gypsum wallboard, and lumber, from the construction or destruction of a structure as part of a construction or demolition project or from the renovation of a structure, including such debris from construction of structures at a site remote from the construction or demolition project site. The term includes rocks, soils, tree remains, trees, and other vegetative matter that normally results from land clearing or land development operations for a construction project; clean cardboard, paper, plastic, wood, and metal scraps from a construction project; except as provided in Section 403.707(9)(j), F.S., yard trash and unpainted, non-treated wood scraps from sources other than construction or demolition projects; scrap from manufacturing facilities that is the type of material generally used in construction projects and that would meet the definition of construction and demolition debris if it were generated as part of a construction or demolition project, including debris from the construction of manufactured homes and scrap shingles, wallboard, siding concrete, and similar materials from industrial or commercial facilities and de minimis amounts of other non-hazardous wastes that are generated at construction or demolition projects, provided such amounts are consistent with best management practices of the construction and demolition industries. Mixing of construction and demolition debris with other types of solid waste will cause it to be classified as other than construction and demolition debris.

For additional information, contact Public Works Services at (321) 868-1240.
